

LLM Design:

Task 1: Chose LLM Domain

My LLM: jamusan code

Main purpose: to help me code ML projects

Target users: me and my team members

General purpose: Coding, especially in Machine Learning

Task 2: Find 3-5 Data Sources:

Dataset Name	Domain	URL	Why Need it
bigcode/the-stack-v2	Coding / 658 languages	https://huggingface.co/datasets/bigcode/the-stack-v2	To teach our model to learn how to code
HuggingFaceFW/fineweb	Web Text	https://huggingface.co/datasets/HuggingFaceFW/fineweb	Thus, is general topic to teach our model
HuggingFaceFW/fineweb-edu	Education	https://huggingface.co/datasets/HuggingFaceFW/fineweb-edu	It should now how to teach me when I need a help

Task 3: Evaluate data Quality:

	Relevance	Safety	Deduplication
Quality	☑	☑	☑
Diversity	☑	☑	☑

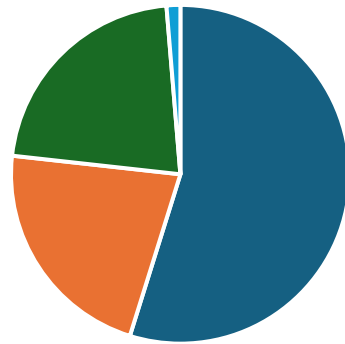

PII	High	High	High
-----	------	------	------

Task 4 License:

Dataset Name	Domain	URL	Why Need it	Licence
bigcode/the-stack-v2	Coding / 658 languages	https://huggingface.co/datasets/bigcode/the-stack-v2	To teach our model to learn how to code	Apache-2-0
HuggingFaceFW/fineweb	Web Text	https://huggingface.co/datasets/HuggingFaceFW/fineweb	Thus, is general topic to teach our model	ODC-By 1.0
HuggingFaceFW/fineweb-edu	Education	https://huggingface.co/datasets/HuggingFaceFW/fineweb-edu	It should now how to teach me when I need a help	ODC-By

Task 5: Design Mixture:

Misture of Dataset

■ Code ■ Web Text ■ Teaching ■ Academic
